

# Adapters for Thermostatic Flow Controls

## Ammark, Bell & Gossett/Tour & Andersson, Danfoss, Taco/Heimeier

Ammark Corporation offers a variety of adapters for the replacement of thermostatic flow controls sold by other TRV companies, as well as for Ammark. The adapters provide a simple and inexpensive changeover solution: retain the current thermostatic radiator valves (if still operational) and replace the control sensors with the proper style Ammark controls:

- Temperature Sensing:** Type 62 or 62P Self-Contained Head  
 Type 63 or 63XL Remote Sensing  
 Type 66 or 66L Remote Dial/Sensing
- Electric:** Type 68 DDC 24V AC, 0-10 V DC  
 Type 69 24 V AC
- Water Sensing:** Type 62C20 Self-Contained 77-140° Range  
 Type 63C20 Pipe Contact 68-122° Range  
 Type 63C40 Pipe Contact 104-158° Range

All adapters are made of nickel-plated brass.

When it is time to replace the old valves, the Ammark Type 6 Series valves can be installed and the adapter discarded to allow the Ammark controls to operate with new Ammark valves.

| Part #  | Description   |
|---|---|
|  | <p><b>Adapter—Ammark.</b><br/>                     Adapter allows any Ammark Type 6 control to be mounted on any Ammark Type 7 thermostatic radiator valve.</p>   |
|  | <p><b>Adapter—Bell &amp; Gossett / Tour &amp; Andersson.</b><br/>                     Adapter allows any Ammark Type 6 Control to be mounted on any Bell &amp; Gossett or Tour &amp; Andersson thermostatic radiator valve.</p> |
|  | <p><b>Adapter—Danfoss.</b><br/>                     Adapter allows any Ammark Type 6 Control to be mounted on any Danfoss Model RA 2000 thermostatic radiator valve.</p>  |
|  | <p><b>Adapter—Taco / Heimeier.</b><br/>                     Adapter allows any Ammark Type 6 Control to be mounted on any Taco/Heimeier thermostatic radiator valve.</p>  |
